

Section A – Basics (Short Answers)

1. What is PPC? (with example)

PPC (Pay-Per-Click) is an online advertising model where advertisers pay each time a user clicks on their ad.

Example:

A dental clinic runs a Google Ads campaign. When someone searches “best dentist near me” and clicks the ad, the clinic pays a small fee for that click.

2. Difference Between PPC and SEO

PPC	SEO
Paid advertising	Organic (free traffic)
Instant results	Takes time
Pay per click	No cost per click
Stops when budget ends	Long-term results

3. What is Quality Score?

Quality Score is a rating (1–10) given by Google Ads that measures the quality of your ads, keywords, and landing page.

Factors Affecting It:

CTR (Click Through Rate)

Ad relevance

Landing page experience

4. What is CTR? (Formula)

CTR (Click Through Rate) shows how many people clicked your ad after seeing it.

Formula:

CTR = (Clicks ÷ Impressions) × 100

5. Why is Landing Page Quality Important?

- Improves Quality Score
- Reduces cost per click (CPC)
- Increases conversions
- Gives better user experience
